

Eclipse

Made to last

What is Eclipse?

Eclipse is the revolutionary new 100% blockout fabric by Textstyle, featuring Sanitized® hygiene protection. Utilizing traditional sunscreen manufacturing processes, this functional and unique product is flame retardant, durable, washable and waterproof, making it the perfect solution for every residential and commercial application.

Why is Eclipse different to other blockout fabrics?

Eclipse does not have a traditional foam blockout coating, its unique formula is non-scratch and non-peel and ever-so-easy to clean, making it ideal for high traffic environments such as gyms, schools, restaurants, hotels, aged care and medical facilities, and is 100% resistant to humidity and moisture.

Where can Eclipse be used?

Eclipse is suitable for every environment. The modern colour palette has been designed to seamlessly complement the Textstyle range of sunscreens, combining to provide an extensive assortment of textures and colours to control light, reduce glare, enhance thermal comfort, regulate temperature, and accommodate privacy.

What is Sanitized® Protection and how does it extend the lifespan of the product?

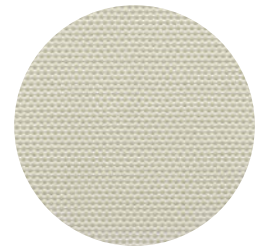

The Sanitized® hygiene function protects the fabric surface from the formation of bacteria, mould, and mildew, and reduces dust mites and odours. Eclipse with Sanitized® Protection ensures the product is continuously cleaner and less at risk of degradation. Sanitized® Protection will last for the useful lifetime of the product.

Where can I find out more about Eclipse?
